PROJECT EXPERIENCE

AP Computer Science A Project: Water Quality Data Processor, Developer

May 2024 - June 2024

- Designed and created an executable program that read in .csv files and sorted data by attributes for analysis
- Built a User Interface using Java Swing class JFrame that enabled user interaction via a cursor and keyboard

MixTwin: DJ Set Planning Assistant, Full-Stack Developer

January 2026 - March 2026

- Designed and developed a web-based music library management and automated set-list generation tool using React and Vercel. Uses Spotify API integration for metadata retrieval and synchronization of track details.
- Built an asynchronous analysis pipeline to process and display track attributes from analyzed track libraries. Engineered a client-side processing tool web audio libraries for BPM and harmonic key analysis. Integrated local file-system uploading allowing users to perform bulk analysis on entire folders with Spotify API data checking for correction.
